

College of Arts and Humanities

www.eiu.edu/~AHColleg

Whether you dream of being a Pulitzer prize-winning journalist, the next Picasso, or becoming the Shakespeare of the modern age, the programs in the College of Arts and Humanities stress creative thinking, analysis, and written and oral communication to help you achieve whatever your dreams may be. While you're here, you might act in or direct your own play seen by hundreds of students and faculty, become an active reporter for the campus, perform in a concert in one of the University's ballrooms, or more. Through experiences in class and out, the program is designed to help develop free and rational-thinking men and women prepared to face the challenges of any profession.

College of Business and Applied Sciences

www.eiu.edu/~lumpkin

Do you have the ambition needed to run a global corporate conglomerate? Design groundbreaking software to rival the current industry standards? Become a mover and shaker in the world market? If you have the will and determination, then you might consider studying in one of the College's schools of Business, Family and Consumer Sciences, Technology, or Military Science. Get an internship at a local business, meet high profile CEOs and civil leaders, or learn leadership in Army ROTC. Out of class or in, the college promotes innovative thinking, problem solving, and entrepreneurship whether you're studying business management, computer information systems, industrial technology, or any of the college's programs.

College of Sciences

www.eiu.ed/~colsci

Is Stephen Hawking your hero? Enjoy debating politics with your friends? Like making chemicals blow up? Whatever your interests, you'll learn practical tools that will assist you both in life on campus and in your future career while working towards a degree offered by the College of Sciences. You'll study along side dedicated professors and instructors in both classes and hands-on laboratories. Learn about molecules being synthesized to help fight AIDS, moving objects by using high intensity sound waves, what happens when stars go super nova, or participate in model governments, which replicate the proceedings of state and federal legislatures. From degrees in sociology to geology, the College of Sciences offers programs to meet the demand of any inquisitive mind.

College of Education and Professional Studies

www.eiu.edu/~ceps

Nothing can compare with helping a child learn and grow. If you dream of being the type of teacher children remember even when, years later, they have children of their own, the College of Education and Professional Studies can help you achieve that dream. Eastern is proud of its distinguished history of offering highly regarded professional programs in education. We are the second largest producer of educators in Illinois, and through the College's programs, you may learn how to operate a school, get hands-on experience through student teaching and observing, or provide counseling for students who need assistance. Whatever you study, you'll participate in field-based experiences that bridge theory with practice in the College of Education and Professional Studies.
